

Physics

Distance, Velocity & acceleration

Match the Graphs and Pictures

For each **displacement** graph, find the **velocity** and **acceleration** graphs for the same kind of motion, then find the **bus picture** matching this kind of motion. Repeat this process for each **displacement** graph. For example, the answer to the first one is d1-v5-a5-b2.

Note: Each **velocity** graph, **acceleration** graph, and **bus picture** might be used once, more than once, or not at all!
